

Program & Speakers Announced! GPED 2025 Annual Meeting

Greetings from Global Pediatric Endocrinology and Diabetes!

We are delighted to share an important update for the **Second Annual GPED Meeting**, taking place virtually on **29–30 November and 6–7 December 2025**.

The **full scientific program and speaker lineup are now available!** This year's meeting brings together a distinguished group of experts, clinicians, and researchers from across the globe who are dedicated to advancing pediatric endocrine care in **resource-limited settings**.

Under the theme:

"Optimizing Pediatric Endocrine Care in Resource-Limited Settings: Bridging Assays, Technology, Management, and Clinical Practice"

the program features:

- Keynote lectures from world leaders in pediatric endocrinology
- Interactive symposia and case-based discussions
- Practical sessions on laboratory assays, affordable technologies, and models of care
- Oral and poster abstract presentations from low- and middle-income countries

 Explore the full program and meet our speakers on the official meeting site.

Don't miss your chance to participate:

- **Registration** remains open at just **15 USD**.
- **Group registrations** for **10 USD** per ticket (Min 5) available!

For details on the schedule, confirmed speakers, and sessions, visit the [official meeting site](#). For inquiries or group registrations, please contact us at gpedmeeting@gmail.com.

We look forward to welcoming you to this exciting global event!

Warm regards,

The GPED Annual Meeting Organizing Committee

diabetes care to all children*

Second GPED Annual Meeting

**"Optimizing Pediatric Endocrine Care in Resource-Limited Settings:
Bridging Assays, Technology, Management, and Clinical Practice"**

29–30 November and 6–7 December 2025 | 1300–1700 GMT

Day 1 (Saturday, 29 November 2025)

Plenary Sessions

- "Delivering optimal ambulatory care to a child with congenital adrenal hyperplasia" | Sudha Rao (India)
- "Artificial intelligence in pediatric endocrinology diagnosis and clinical care" | Hussain Al Saffar (Oman)

Meet the Experts

- "Setting up a successful newborn screening program" | Aman Pulungan (Indonesia)
- "Management of constitutional delay of growth and puberty and congenital hypogonadotropic hypogonadism" | Romina Grinspon (Argentina)

Hyperinsulinism Symposium

- "Diagnosis of hyperinsulinism: role of genetic testing in resource limited settings" | Sarah Flanagan (UK)
- "Managing congenital hyperinsulinism in resource-limited settings: Challenges and practical solutions" | Sommayya Aftab (Pakistan)
- "Parents as advocates for access to diazoxide" | Julie Raskin (USA)

Debate

- "Long and short acting analogues of insulin in resource-limited settings: should they be promoted" | David Beran (Switzerland) / Salwa Musa (Sudan)

Day 2 (Sunday, 30 November 2025)

Plenary Sessions

- "Novel aspects of management of Type 2 Diabetes in children and adolescents" | Junfen Fu (China)
- "Bone health: Bisphosphonate treatment in pediatric patients" | Marie-Eve Robinson (Canada)

Diabetes Symposium

- "Thermostability of insulin: Implications for access and storage in resource-limited settings" | Graham Ogle (Life for a Child, Australia)
- "Management of Type 1 Diabetes in resource-limited countries: recommendations from the ISPAD guidelines" | Anju Virmani (India)
- "Lessons learnt from setting up diabetes registries in Arab countries" | Hessa Alkandari (Kuwait)

Meet the Experts

- "Practical approach to dyslipidemia in infants and children" | Mohamed Aldubayee (KSA)
- "How to recognize and manage Addison's Disease in resource limited settings" | Tania Bachega (Brazil)

CLAN Child Health Session

- "Working together as @MATES4Kids – Driving Change for CAH in Zimbabwe" | CLAN Child Health Africa

Day 3 (Saturday, 6 December 2025)

Plenary Sessions

- "Gender dysphoria: An historical perspective in India" | Sanjay Sharma (India)
- "Physiology and management of adolescent PCOS" | Selma Witchel (US)

DSD/Adrenal Symposium

- "When does genetic testing improve clinical management" | Katie Ayers (AU)
- "From bench to bedside: Advances in diagnosis and monitoring of Testicular Adrenal Rest Tumors in CAH" | Hedi L Claahsen van der Grinten (Netherlands)
- "Androgen insensitivity syndrome: Diagnostic challenges and management in resource restricted settings" | Faisal Ahmed (UK)

Meet the Experts

- "Evaluation of the pituitary function in the first 6 months of life" | Mehul Dattani (UK)
- "Hormone replacement in young people with premature ovarian insufficiency" | Debbie Matthews (UK)

Poster and Oral Presentation Session

Day 4 (Sunday, 7 December 2025)

Plenary Sessions

- "Endocrine complications in childhood cancer survivors: A growing need in global health" | Margaret Zacharin (AU)
- "The challenge of setting up a pediatric endocrine center in resource limited countries and war zones" | Mohamed Ahmed Abdullah (Sudan)

Debate

- "Male gender assignment in severe 46,XX CAH: clinical and ethical perspectives" | Sonir Antonini (Brazil) / Anastasia Ediat (Indonesia)

Thyroid Symposium

- "Optimizing hyperthyroidism management: Affordable and practical approaches" | Adele Chetcha (Cameroon)
- "Subclinical hypothyroidism" | Francisca Grob (Chile)
- "A review and perspective of the new thyroid cancer guidelines" | Andrew Bauer (US)

Meet the Experts

- "Diagnostic approach of the child and adolescent with frequent fractures" | Amish Chinoy (UK)
- "Creating safe and inclusive schools for children with diabetes" | Terry Piloja (Uganda)
